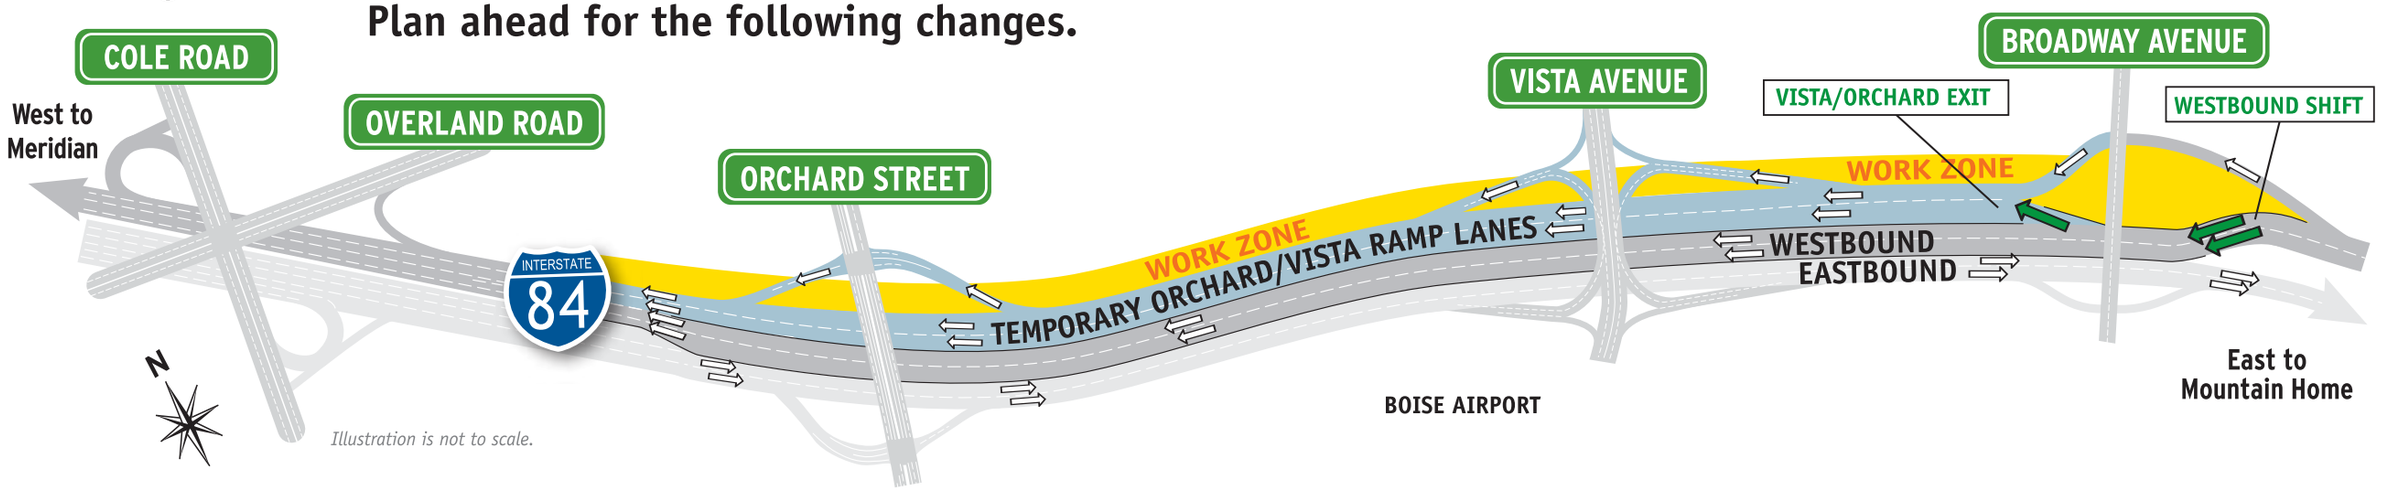
I-84 Traffic Changes – August 2010 to January 2011

I-84 EAST
Cole to Broadway

The Idaho Transportation Department is widening I-84 to eight lanes between the Cole and Broadway interchanges. The project is expected to be complete by summer 2011.

Plan ahead for the following changes.



Major changes coming to westbound motorists

- Motorists will be shifted to the eastbound side of the interstate at the Broadway Interchange.
- Motorists who want to exit at the Vista or Orchard interchanges will use temporary ramp lanes that begin after the Broadway Interchange.
- Traffic entering I-84 at Broadway or Vista will also use the ramp lanes.
- If motorists miss the temporary exit at the Broadway Interchange, they can exit at the Cole/Overland Interchange and return to eastbound I-84.
- **Missing the ramp lanes may add at least 10-15 minutes to your commute.**
- On- and off-ramps will be narrower.
- The speed limit for ramp lanes will be 45 mph.
- **The route will not change for eastbound motorists until early 2011.**

Additional traffic impacts

- Two lanes on I-84 will be open during the day in both directions.
- At least one lane on I-84 will be open at night in both directions between 10 p.m. and 5 a.m.
- Anticipate increased noise and vibrations in September.
- The speed limit will be 55 mph.
- **Pay attention and plan extra time when driving to the airport. Vista Avenue will be open at all times.**
