Sept. 3, 2008

Dear resident/business merchant,

The Idaho Transportation Department is resurfacing a 1.5-mile section of Broadway Avenue (U.S. 20) this month. The project will repair pavement on Broadway from Rossi Street south to the Ridenbaugh Canal, near the Federal Way Overpass.

To minimize inconvenience to businesses and residents during peak traffic hours, crews will work a weekday evening and overnight schedule. While the transportation department does everything possible to minimize impacts, you should still be prepared for some inconvenience during this time. Please note the following:

- **Significant nighttime noise can be expected while crews are working in the area;**
- Paving is scheduled to begin **Tuesday (Sept. 9) and continue for approximately 3 weeks**;
- Crews will be using vibratory rollers to compact the new pavement, this will create a noticeable vibration to nearby residents;
- Construction equipment with back-up alarms may be heard within the work zone;
- Once project completion nears (scheduled for late October), crews will again use jackhammers to raise manhole covers to the new road level.

We ask you to bear with us during construction, and appreciate your patience.

Once completed, the project will extend the life of the roadway and result in a smoother ride. All lanes will remain open from 8 a.m. to 6 p.m. At least one lane in each direction will remain open during construction. The project is scheduled for completion in late October.

If you have any questions about the project or its impacts, we would be happy to provide further details. Thank you again for your patience.

Sincerely,

Reed Hollinshead
Idaho Transportation Department
