U.S. 95 – Cougar Creek to I-90 Overpass @ exit #12

July 17, 2017 Construction Update

During the week of July 16, work will include the installation of new roadside signs and final project cleanup work from Blackwell Slough to Cougar Creek. Active project work will occur from 5 a.m. to 5 p.m., Monday through Friday.

Motorists should anticipate increased travel times, intermittent speed reductions, and intermittent lane or shoulder closures. Pilot cars and flaggers may be used to guide traffic throughout the various areas of the project.

On Monday July 17, lane closures will occur on U.S. 95 from Linden to I-90. Flagging and one-lane traffic will be in effect from Walnut to Blackwell Slough.

This $2.2 million Idaho Transportation Department project is being performed by Poe Asphalt, Inc. of Post Falls. Work is scheduled through early August. This project will resurface U.S. 95 and improve traveler safety with new guardrail and signs.
