

US 91 North Corridor Plan

The US-91 North Corridor Plan was prepared by the Idaho Transportation Department (ITD) to provide a comprehensive, long-range planning document that will guide corridor management and project programming over the next 20 years.

The documents presented on this CD-ROM are provided in several files that are in Adobe Acrobat PDF format. Adobe Acrobat formatted files offer several options that will facilitate the viewing of large, complex documents including: enhanced document navigation options, text string searches, zooming capability, document printing, and file saving to a local PC.

Explore the Plan by selecting the chapters below.

[Cover](#)

[Table of Contents](#)
