INTRASTATE MIGRATION ESTIMATES  
Based on Movement of Passenger Vehicles  
By County, 2001 through 2010**

We are frequently asked about the number of people moving from one county to another (intrastate movement). There is no database tracking people, but the movement of passenger vehicles (vans, cars, and pickup trucks) provides some general indications. These vehicles must be annually registered by county of owner's residence. On average, each driver in Idaho has 1.2 cars. Roughly, then each car below approximates one person but excludes children. For the past nine years, movement of vehicles into, and out of counties of residence are depicted on the table below. A more detailed matrix of Vehicle Movement Between Counties, is also on this website.
