PRESENTATION TITLE: Browns Park Byway - FHWA/Local Project using Observational Approach

SPEAKERS: Stanley Crawford, PE, American Geotechnics

**DESCRIPTION:** The Browns Park Byway project is a federal aid project where the county is the roadway's owner. The project consists of two segments of roadway; Segment 1 includes paving and other roadway improvements to an existing roadway and Segment 2 includes a new roadway alignment through scenic mountain terrain. The observational approach was used to complete the design and construction due to difficult and isolated terrain and investigation constraints.
