

Exhibit 1300-4 Non-Barrier Noise Abatement Checklist

Project Name: Intersection Snake River Avenue/Southway Avenue, Lewiston

Project Number: STP-7014(102)

Key Number: 9029

Feasibility:	YES	NO
1. Can traffic management measures be implemented which conform to the purpose of the project and achieve at least a 5 dBA reduction in sound levels at the impacted receptor(s)?		X
2. Can alignment alterations be implemented which conform to design standards and achieve a 5 dBA reduction in sound levels at the impacted receptor(s)?		X
3. Can a buffer zone be provided which achieves a 5 dBA reduction in sound levels at the impacted receptor(s) and results in no displacements?		X
4. Is there an impacted public use or non-profit institutional structure in the project area and can insulation be provided which achieves a dBA reduction in sound levels inside the structure?		X
If no to <u>all</u> of the above, these measures are not feasible	END	
If yes to <u>any</u> of the above, the measure is feasible. Therefore, consider the reasonability of the measure determined to be feasible.		
Reasonability:	YES	NO
1. Does the cost of implementation meet the cost per benefited residence criterion?		
2. Does this measure conform to local plans and land use regulations?		
3. Is the measure consistent with state and federal environmental laws, regulations, and best management practices?		
4. Additional considerations?		
Desirability:	YES	NO
Does the local jurisdiction endorse the measure(s)?		X
