

# Hull Identification Number Inspection

Idaho Transportation Department

ITD 3402 (Rev. 03-16)  
Supply # 019580300

• **This form is for vessels only and is required to be fully completed. Do not use codes from any title. Spell out makes/models.**  
This form must be filled out by a law enforcement officer or an authorized agent of the Idaho Transportation Department (ITD) directly from the vessel without the use of other documentation. **Note:** This form is **not** an ownership document.

Hull Identification Number (HIN - must have 12 characters)											<input type="checkbox"/> HIN Discrepancy (Explain):		
1	2	3	4	5	6	7	8	9	10	11	12		
<b>HIN Locations</b>		<input type="checkbox"/> Transom <input type="checkbox"/> Aft Crossbeam <input type="checkbox"/> Other (Describe):

Inspection Officer or Agent's Signature (I certify I have physically inspected the vessel described above) X								Applicant's Name					
Agency Name						Badge Number		Applicant's Address					
City/Area				Date Inspected		City, State, Zip			Daytime Phone Number				

### Engine Drive Types

- **Inboard:** An engine mounted inside the confines of a vessel which powers a drive shaft that turns a water jet impeller or that runs through the bottom of the hull and is attached to a propeller at the other end.
- **Outboard:** An engine with a propeller or water jet integrally attached, which is usually mounted at the stern of a vessel.
- **Pod Drive:** An engine mounted in front of the transom of a vessel and attached through the bottom of the hull to a steerable propulsion unit.
- **Stern Drive:** An engine powering a propeller using shifts and gears, mounted in front of the transom of a vessel and attached through the transom to a drive unit that is similar to the lower unit of an outboard, which may also be known as an inboard-outdrive or an inboard-outboard.

### Vessel Body Type

- **Air Boat:** A vessel that is typically flat-bottomed and propelled by an aircraft-type propeller powered by an engine.
- **Auxiliary Sail:** A vessel with a sail as its primary method of propulsion and mechanical propulsion as its secondary method.
- **Cabin Boat:** A vessel propelled by propulsion machinery that provides enclosed spaces inside its structure.
- **House Boat:** A motorized vessel that is usually non-planing and designed primarily for multipurpose accommodation spaces with low freeboard and little or no foredeck or cockpit.
- **Inflatable:** A vessel that uses air-filled fabric for buoyancy (Plastic and >12 ft. – Titled and Registered, Rubber/Vinyl/Canvas – Registered only).
- **Open Boat:** A vessel equipped with propulsion machinery which has an open load carrying area that does not have a continuous deck to protect it from the entry of water.
- **Personal Watercraft:** A vessel propelled by a water-jet pump or other machinery as its primary source of motive power and designed to be operated by a person sitting, standing, or kneeling on the vessel, rather than sitting or standing within the vessel's hull.
- **Pontoon Boat:** A vessel with a broad, flat deck that is affixed on top of closed cylinders which are used for buoyancy, the basic design of which is usually implemented with two rows of floats as a catamaran or with three rows of floats as a trimaran.
- **Sail Only:** A vessel propelled only by sails.

### Most Common HIN Locations

### Propulsion Types

- **Air Thrust:** Aircraft-type propeller powered by an engine.
- **Propeller:** A mechanical device consisting of a revolving shaft with two or more angled blades attached to it.
- **Sail:** A piece of material extended on a mast to catch the wind.
- **Water Jet:** An engine which propels by means of ejecting a jet of water.
