## I-90, Northwest Blvd. to Sherman Ave., Cd'A

*Aug. 27, 2017 – Construction Update*

Traffic remains on the eastbound side, and is still reduced to one lane in each direction. Work-zone crossovers are in effect for I-90 westbound, on- and off-ramps at 15<sup>th</sup> Street, and the Sherman Avenue on-ramp.

Construction continues on the westbound side between 9th Street and Sherman. Work includes pavement removal, excavation, gravel placement, paving and guardrail installation.

Work is beginning between Centennial Trail Bridge and NW Boulevard. Work will occur at night between the hours of 10pm to 5am, traffic will be reduced to one lane during these hours.

Westbound freeway traffic is reduced to one lane until the end of September. Travel widths in this area will be reduced to 11 feet with 12.5 feet of clearance over Centennial Bridge.

Motorists should anticipate increased travel times, speed reductions, and lane shifts. The work zone speed limit **is reduced to 45 mph** through the city of Coeur d'Alene, and travel widths reduced to 11 feet with 15 feet of clearance.

**Motorists are reminded that they are required to yield to I-90 traffic when entering the freeway!**

This project will resurface I-90, increase height clearances between the travel way and numerous overpasses that exist throughout the corridor, and improve traveler safety with new guardrail, signs, and illumination.

Interstate Concrete & Asphalt, of Rathdrum, is performing this \$19.8 million Idaho Transportation Department project.

**Please drive carefully and be aware of construction vehicles!**
