US-95, Ironwood Intersection

Sept. 24, 2017 Construction Update

At the new Medina intersection on Ironwood Drive, west of U.S. 95, paving is complete, but the intersection won't fully open until the signal is installed in mid- to late-October. Left turns off of Medina are prohibited until then. Work will occur during daytime hours, Monday through Friday.

Paving is ongoing on the U.S. 95, Ironwood Intersection, and it should be opening soon after that. Work will occur during daylight hours, Monday through Friday.

In addition, Avista is installing a new gas line along the north side of Ironwood. Work is expected to be during daytime hours, Monday through Friday, with possible work on Saturdays.

This project will resurface U.S. 95, improve the intersections of Ironwood and Emma on U.S. 95, and add turn lanes and improved signalization.

Motorists should anticipate lane constrictions and shifts on Ironwood to accommodate construction. Also increased travel times, speed reductions, and intersection work. Traffic is being controlled with temporary traffic control, flaggers, and utilization of existing signals. Flagging may be in effect throughout various areas of the project.

This \$1.8 million city of Coeur d'Alene project is being performed by CameronReilly, of Spokane Valley, Washington.
