

US-95 & ID-53 Interchange, Garwood Road, UPRR Bridge & Frontage Roads

Overview:

The Idaho Transportation Department (ITD) will reconfigure several roadways near the US-95 junctions with ID-53 and Garwood Road north of Hayden. The proposed project will:

- Construct a new interchange at US-95 and ID-53.
- Realign and widen ID-53 from Ramsey Road to US-95.
- Replace the existing deficient ID-53 bridge over the Union Pacific Railroad (UPRR).
- Provide a grade separation at Garwood Road over US-95 and the UPRR (eliminate direct access to US-95 at Garwood Road).
 - Construct a new east-side frontage road from ID-53 to Garwood Road.
 - Construct an assortment of connector roadways.

This project is part of a larger vision to improve traffic flow and enhance safety on a local and regional level for present and future users along US-95 between Garwood Road and Sagle.

Cost:

Design and construction of this project are expected to cost \$41 million.
