

I-15 ARIMO TO MCCAMMON PROJECT

JUNE – FALL 2017

The Idaho Transportation Department will resurface approximately seven miles of Interstate 15 from Arimo to McCammon.

The interstate road surface is deteriorating and needs to be replaced. The resurfacing work will eliminate rough sections and soft spots in the road. As a part of this project, ITD will also upgrade the guardrail on I-15.

Through a method called Cold-in-Place Recycling, ITD will re-use the old pavement in the new roadway. This method reduces waste and lowers costs.

Traffic impacts:

- I-15 will be reduced to one lane in each direction in the project area.
- Both north- and southbound interstate traffic will travel on the same side of I-15.
- Some blasting of rock may be necessary early in the project to build crossover lanes for shifting traffic. The interstate may be closed for 15 to 20 minutes during the blasting.
- Oversized loads may be detoured. Check 511.idaho.gov for more details.
- The speed limit will be reduced.
