Good Day Special Permit Holders,

Idaho is implementing a new special permit software system (ITRPS, Idaho Transportation Permit System) starting July 1st, 2019. The system will allow you the customer to process your own permits online, at your convenience. You will still be able to call in to the special permit office during the business hours of Monday – Friday, 7:30 am – 5:00pm MST. at 800.662.7133 for help with your permitting needs. In preparation for the transition to the new system, the permit office will not process any current annual renewals after May 31st until July 1st.

The permit office will extend the expiration date of any annual permit that expires between the above mentioned dates until July 5th. The enclosed memo may be shown to enforcement officials if needed to explain the extension. They have been made aware of this extension.

This will allow you the customer to take advantage of the consolidated permits that also start on July 1st of 2019. Please go to itd.idaho.gov/trucking for more information on the new permitting system, the consolidated permits, and permit pricing.

We look forward to being able to serve you with the new permit system.

Please feel free to contact me with any questions.

Regards,

Craig Roberts
