Drive Insured Extension

03-24-2020-Release Note

Below is an update on the Drive Insured law that went into effect on January 1, 2020.

Given the current events related to COVID-19, ITD will be issuing automatic extensions through June 30th to Driver's License/IDs, and Non-commercial Vehicle Registrations. March was the first month that ITD planned to provide warning letters to folks found to have had two consecutive months without auto insurance and suspend their registration if they failed to comply within 30 days.

With businesses closing across the state and most DMV offices closed statewide, ITD will stop the Drive Insured warning letters and will not be sending these out. ITD will align the Drive Insured program with the automatic extension of the other credentials until **June 30th**. The program will resume then.
