Consular Cards Acceptable for Liability Signer Identification

06-10-2020

Effective immediately, unexpired Mexican Matricula Consular cards are now considered an acceptable form of identification to confirm the relationship between a driver under 18 years of age and an authorized individual willing to assume liability for that driver, as required by Idaho Code §49-310.

Under no circumstances should the Mexican Matricula Consular card be used as an identity document for any other purpose.

Please refer to the linked document for more information on consular cards. Note: The older red, white, and green cards shown on the last page of this document are now all expired and should not be accepted for the above-described purpose.
