## Driver's Training School Exception

**04-14-2020**

The Department of Education has approved an allowance for driving school students to perform the classroom portion and driving portion of the driver's training at separate times.

**As a result, ITD has also issued a blanket waiver to allow students to attend the class portion of driver's education before obtaining a driver's training permit.** ITD has not issued a waiver for students to perform the driving portion of the class without obtaining their driver's training permit. The student's 180 day waiting period will not begin until after they have obtained their training permit and subsequently complete the driving portion of driver's education.

Please be advised that you may hear of students starting the class before coming into your office to obtain a permit.
