RE: Hemp Procedures

The Governor's Executive Order [2019-13](#) allowing the interstate transportation of Hemp was issued 11-19-19. This executive order does not authorize or legalize the production of hemp, its byproducts, oils or any other derivative prohibited by Idaho law. This executive order serves as a stopgap measure until the Idaho Legislature enacts a more permanent solution.

The executive order directs all Hemp haulers to stop at the first port of entry (POE) encountered in Idaho in order to declare the presence of any hemp.

Staff are to contact ISP dispatch to advise them that a Hemp hauler is located at a POE. ISP dispatch will have a trooper respond. If no trooper is available to respond, then POE staff are to complete a contact report and review the following documents that should be in possession of the Hemp hauler.

- An affirmation from the driver that their vehicle contains no illicit drugs or variations of hemp not explicitly authorized by the 2014 Farm Bill or the 2018 Farm Bill;
- Verification, including a copy of the hemp production license from the producer of the hemp being transported, that the hemp was produced by a grower or producer duly-licensed by a state or Indian Tribe authorized to regulate hemp production under the 2014 Farm Bill or the 2018 Farm Bill;
- A laboratory results report which confirms each lot of hemp being transported complies with the 2014 Farm Bill or the 2018 Farm Bill, as provided in 7 C.F.R. §§990.70(d) and 990.71(d), and which was produced by a DEA-registered laboratory; and
- A bill of lading, containing the shipment contents, origination, including lot number, and destination of the hemp, the weight of the load, and the type of vehicle hauling or transporting the hemp.

A contact report assists ISP and POE staff as it serves as a notice that the Hemp hauler did stop at the first open POE that they encountered.

These procedures are effective immediately and there may be other future directives to carry out the executive order.

I thank you for your patience and adherence to this directive.
