February 1, 2022

To: Idaho Telecommunications Service Providers

RE: Idaho Transportation Department, Idaho Transportation Investment Program (ITIP) Ground Disturbance Projects for Fiscal Years 2022-2028

In support of Governor Little's Idaho Broadband Initiative to expand stable, reliable broadband infrastructure for Idaho communities to attract business and enhance quality of life for Idahoans, the Idaho Transportation Department (ITD) is providing information on future highway reconstruction, realignment, widening, expansion, and bridge replacement projects. These types of projects provide an opportunity to coordinate with ITD to accommodate future expansion of broadband infrastructure during the project development and construction phases.

This coordination will allow telecommunications providers with advanced notice of upcoming projects and also supports the goal of "DIG ONCE" to place infrastructure during the construction phase of a project.

To view upcoming projects please visit our web mapping service: <https://arcg.is/OHDT880>

ITD would like to coordinate with providers on future expansion of broadband infrastructure along the State Highway System and particularly these upcoming projects. We invite you to contact the respective ITD District Headquarters Office, Planning & Scoping Section (contact information is included in the attached map). Please note the Project Key Number and description with your inquiry.

Respectfully,

Blake Rindlisbacher
