The Idaho License Plate factory had an equipment failure. Normal operations are anticipated by July 29, 2022. Due to the extended outage, however, it will take time for plates to be sent to customers. **The plates on order form you received at the time of registration is still valid.** Continue to keep this form in your window when operating the vehicle. ITD has updated Law Enforcement so they are aware of the situation. Your registration is valid without the metal plate. We are sorry for the inconvenience.
