

# New look & mobile App launch for the Idaho 511 Road Report

#### What do I need to do?

After the new site launch, your old 511 mobile app will no longer receive crucial roadway information feeds. You will need to download a new version of the Idaho 511 app from the Apple or Android app stores and **delete any old versions** of the 511 app.

- Apple version Idaho 511 app
- Android version Idaho 511 app

If you had a 511 account on the previous 511 site, you will need to create a new account. A 511 account allows you to customize the map settings and save routes for a streamlined experience.

#### Is the website changing?

The web address <u>511.idaho.gov</u> is staying the same, however the site's layout will be slightly different. If you had a user account on the previous site, you would need to make a new account. An account allows you to customize the map settings, save routes or set up notifications.

#### Is the phone number changing?

No, you can still call **511** for travelers' advisory information.

#### What about the Idaho 511 Trucker app?

The Idaho 511 Trucker app will no longer receive current travel information once the new site launches. You will need to switch over to the new Idaho 511 app and delete the old Idaho 511 Trucker app.

The new Idaho 511 app includes the same trucker information details as the old app. With one click you can turn on the "Trucker Mode" or select specific 511 features from the map legend depending on your needs.

#### What are some new features?

The new Idaho 511 app has all the same tools to help you plan your trips, plus additional features. The new app displays special events that might impact travel, seven-day weather forecasts, Oasis locations, and more. Oasis locations are private-public partnerships that provide restroom facilities free of charge 24/7.

You can create a 511 account to save travel routes and sign

up for notifications when your routes are impacted. If you had an account with the previous 511 system, you would need to create an account on the new site to customize your map settings, save routes or set up notifications.

## need to create an account on the new site to customize your map settings, save routes or set up notifications.

### Why is the Idaho 511 website and app changing?

The 511 site and app are changing because the Idaho Transportation Department has a new vendor for the Idaho 511 road report system.
