

SH-69 Corridor TRAFFIC STUDY

KUNA TO MERIDIAN

The Idaho Transportation Department is studying the State Highway 69 Corridor from Orchard Avenue in Kuna to Overland Road in Meridian. The purpose of this study is to develop a vision of the corridor that will accommodate motorized and non-motorized users for the next twenty years.

Background:

State Highway 69 from Kuna to Meridian was widened to four through lanes by two projects in 1991 and in 2001. These improvements were expected to accommodate travel through 2022. Now is the time to develop a highway for the next twenty years in the future.

Proposed vision includes:

- Widening SH-69 to seven lanes between Overland and Kuna roads.
- Widening SH-69 to five lanes between Kuna Road and Orchard Avenue.
- Installing a new continuous raised median.
 - Access onto the highway will only be allowed at mile and 1/2-mile intersections.
 - All other access onto the highway will be right-in and right-out.
- Adding a 10-foot multiuse pathway on each side.

ITD will continue to keep the community informed during this process.

Process and Schedule:

Updated traffic study	2024
Develop proposed vision	Fall 2024/ Early 2025
Host online meeting to gather input	Spring 2025 <small>WE ARE HERE</small>
Finalize proposed vision	Summer 2025

Once the proposed vision has been finalized, ITD can identify funding for environmental, design and construction. The Idaho Transportation Board is working on an agreement to build improvements through private development funding.
