

CONSTRUCTION OVERVIEW

The Idaho Transportation Department is widening I-84 between the South Jerome Interchange (Exit 168) and the Twin Falls Interchange (Exit 173). I-84 serves as a primary interstate route, with traffic counts expected to double over the next 20 years. This project will increase capacity and improve safety on I-84 to serve South-central Idaho for years to come.

Work will begin April 2023 and be completed in late fall 2026. This year, construction crews will build the new lanes and median wall on I-84. In addition, work will begin at the 400 S Road Bridge to accommodate the widening of I-84.

WHAT TO EXPECT IN 2023:

- I-84 will be restricted to one lane in each direction at night. Occasional daytime lane restrictions may be necessary.
 - Rolling closures on I-84 will occur this spring/summer for blasting rock in the median.
- Traffic shifts will be used throughout construction.
- The speed limit on I-84 will be reduced.
- E 400 S Road will be closed intermittently.

IMPROVEMENTS INCLUDE:

- Widening I-84 to three lanes in each direction.
- Placing a concrete overlay on existing pavement.
- Reconstructing the 400 South Road bridge.

This project being funded with Transportation Expansion and Congestion Mitigation (TECM) funds as part of the Leading Idaho TECM Program. The program allows ITD to accelerate project timelines to address rapid growth and build critical infrastructure today that would otherwise take many years to fund and build.
