

# I-84

## CORRIDOR

### SH-44 TO CENTENNIAL WAY

The Idaho Transportation Department is completing a study to improve I-84 between SH-44 (exit 25) and Centennial Way (exit 27) interchanges. This study has identified improvements to increase safety, mobility and capacity. The project is part of ITD's ongoing efforts to improve I-84 in Canyon County.

#### Improvements include:

- Widening I-84 and replacing irrigation structures.
- Replacing the US-20/26 Interchange.
- Replacing two ramps at the Centennial Way Interchange.
- Replacing and widening the Boise River Bridge near Centennial Way.
- Replacing the SH-44 Interchange.

#### Project process and schedule:

2018	Completed in-depth traffic study for I-84 between Caldwell and Nampa.
2023-2024	Began environmental evaluation and hosted public meeting.
2025	Began design plans for SH-44 Interchange (exit 25).
2026	Host second public meeting, complete environmental evaluation, and finalize design and construction plans for SH-44 Interchange.
TBD	Begin construction on SH-44 Interchange when funding is available.

*The SH-44 Interchange is only one of several improvements in this area. Completing the environmental study now will allow ITD to move quickly when funding is available for the remaining improvements.*

#### Community involvement

ITD is working with agencies, municipalities and members of the public who have a stake in the project. To stay informed and learn about future opportunities to give input:
